	REMARKS.	

GREETING

We take this opportunity to thank our friends and patrons for the many favors, and we desire to say that we will use every endeavor to please them and all others who favor us with orders, large or small.

The efforts to establish a reputation for dealing in FIRST QUALITY GOODS ONLY have met with success, and we are confident that by pursuing the same course in the future, as we have in the past, our business will continue to increase, and our methods will meet with approval from all discriminating purchasers.

CAREFUL TESTS OF OUR SEEDS have been made to ascertain their growth. Testing has always been practiced by us and is one of our many methods to maintain a high standard of quality.

WE ARE THE ONLY HOUSE IN NEW ENGLAND carrying a full stock of Seeds, Tools, Implements and Repairs for the wants of the RETAIL TRADE EXCLUSIVELY. Cheap goods for country store trade we do not handle. Personal attention to business, prompt shipments, reasonable prices, FIRST QUALITY GOODS, have built up a business and given a reputation of which we are proud. The same course will be pursued in future to maintain that reputation as was in the past used to obtain it.

SITUATIONS WANTED.

We will be pleased at all times to receive inquiries from any person desiring the services of Gardeners, Farmers or Assistants. We keep a list of reliable persons wanting such situations, and recommend only such as we think are competent to meet the requirements of employer. We make no charge for our services.

We inform all former patrons that we can and will use them just as well in the future, and we trust that those who have not yet traded with us will give us a trial.

Yours truly,

THOMAS J. GREY & CO.

Remarks to Purchasers.

Send Early Orders and there will be no cause for complaint at delays in their execution.

Orders from Unknown Parties, to insure prompt attention, must be accompanied by a remittance, or by satisfactory reference to some responsible house or person in this city.

Our Terms are Net Cash. All pills on which short credits are allowed are due the first of the month succeeding the date of purchase. Lills on which longer time is desired must be provided for by special agreement.

Prices, Etc. As prices of some varieties of seeds will doubtless vary during the year, we beg to assure purchasers that ours shall be at all times as low as any for seeds of like good quality. Quotations, with samples, will be cheerfully given for such variable articles as grass and clover seeds, onion sets, etc.

Remittances may be made by Draft, Money Order, American Express Company's Money Order, Cash by Express, or in Registered Letter. Postage Stamps may be sent for moderate amounts.

Seeds by Mail. We send all seeds ordered at ounce or packet rates, free of charge for postage. All heavy seeds, including peas, beans, corn, clover seed, seed grain, roots, etc., are quoted at net prices at our store. Purchasers desiring these by mail are requested to remit an additional amount sufficient to cover the postage at the rate of 8 cents per pound, or 15 cents per quart.

Address, Etc. In ordering, please use the order sheet which we send with each catalogue, and be particular to sign your name, also that of your post office, county and state, plainly; also mention the mode of conveyance you prefer.

Liberal Premium on Seeds in Packets When the order is accompanied by the money, purchasers of seeds in packets at catalogue prices may select 25 cents worth extra packets for each \$1.00 sent. Thus, any one enclosing \$1.00 may order seeds in packets amounting to \$1.25. Two Dollars sent us with the order will pay for seeds in packets amounting to \$2.50, and so on. Please remember this discount applies on packets only.

Cloth Bags used in Packing are charged at the following rates: Quarter bushel, 8 cents; half bushel, 10 cents; one bushel, 15 cents; two bushels, 20 cents. If returned, clean and in good condition, free of expense, they will be credited as charged. In remitting for seeds by the peck and over, please add a sum to cover cost of the necessary bags.

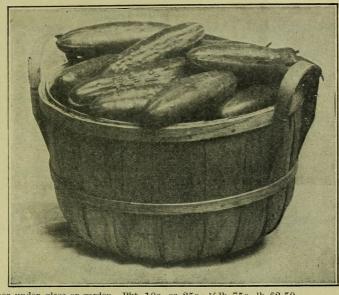

Our Guarantee: While we exercise the greatest care to have all seeds pure and reliable, we do not give any warranty, express or implied. If the purchaser does not accept the seeds on these terms and conditions, they must be returned at once, and the money that has been paid for same will be refunded.

Kindly send us a list of your friends who use seeds and bulbs, and we will be pleased to mail them our catalogues. Our new Bulb Catalogue will be ready in September.

THE DAVIS PERFECT CUCUMBER.

As a forcing cucumber the Davis Perfect has no equal. Its excellent eating qualities, shape, color and productiveness place it without a rival. To obtain the best results for forcing under glass the plants should not be planted as close together as other forcing strains. It is a very vigorous grower and if planted too close will not do as well. Mr. Davis places his plants about five feet apart.

It is a shy seeder. We recommend for the market gardener as well as for those who grow cucumbers

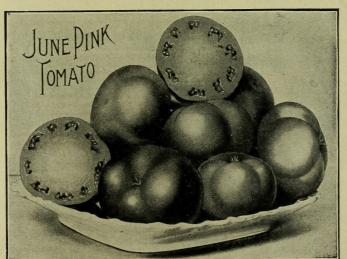

for their own use either under glass or garden. Pkt. 10c., oz. 25c., 1/2 lb. 75c., lb. \$2.50.

JUNE PINK TOMATO.

The June Pink Tomato in habit of growth is similar to the Earliana. The plant is neat and compact, branching freely, with fruit hanging in clusters of six to ten fruits both in the crown and at the forks of the branches. Under exactly the same conditions as given Sparks' Earliana and Chalk's Jewel, the June Pink yielded as much fruit as either, and the vines after the crop had been harvested were greener and brighter, and showed no tendency to blight. It ripens fully as early as the Sparks' Earliana and quite ten days to two weeks ahead of Chalk's Early Jewel.

The fruit is of medium size, uniform, smooth, and attractively shaped, without cracks or any green

ore The fruit will average 2\frac{3}{4} to 3 inches in diameter, and from 2 to 2\frac{1}{4} in ches in depth. The skin is reasonably tough, so that it is excellent for shipping purposes.

In color, it is a bright pleasing pink, and in markets where a pink tomato is desired will bring 25 per cent. more in price than any red variety. It has the further quality, making it especially desirable for private use, of continuing to be ar and ripen fruit up until frost.

10c. pkt., \$1.25 oz.

VEGETABLE SEED SPECIALTIES.

BEANS.

Giant Stringless, Green Pod. Color deep green, very long, round, fleshy pods; very prolific and entirely stringless. Pkt., 10c.; Qt., 30c.

Stringless Refugee Wax. Pods round, extra long, quality very fine, perfectly stringless. Pkt., 10c.; Qt., 35c.

Extra Early Refugee. Pods green, round, quality excellent, extremely early and prolific. Pkt., 10c.; Qt., 30c.

CABBAGE.

Early Spring. The earliest flat-headed cabbage in cultivation; as early as Wakefield. The heads are uniform and very solid. Pkt., 10c.; Oz , 30c.

CARROT.

Early Chanteney. The best sort for bunching, stump rooted, and a good color at all stages of growth. Pkt., 5c.; Oz., 10c.; Lb., \$1.00.

SWEET CORN.

Washington Market. Medium late variety. One of the best for general crop for market or private use. Ears of large size with 16 to 18 irregular rows. Kernels deep and tender. Pt., 15c.; Qt., 25c.; Pk., \$1.50.

MUSK MELON.

Rocky Ford. This has become one of the most popular melons. The fruit is oval; slightly ribbed, and covered with heavy netting. Flesh thick and green, very sweet and luscious. Pkt., 5c.; Oz., 10c.; ¼ Lb., 30c.

Long Island Beauty. The earliest and finest of the Hackensack type of melons. Fruit very juicy and sweet. Pkt., 5c.; Oz., 25c.; 1/4 Lb., 75c.

WATER MELON.

Coles Early. Very early variety, rind thin, flesh very deep and sweet, color light green striped. Pkt., 5c.; Oz., 10c.,; ½ Lb., 25c.

Sweet Heart. Vine vigorous and productive, ripening its fruit early. Fruit large, oval, uniformly mottled light green. Thin rind, but firm. Flesh bright red, firm and solid, very sweet and melting. Pkt., 5c.; Oz., 10c.; ½ Lb., 25c.

PEAS.

Thomas Laxton. A decided improvement on Gradus, from which it is crossed with an extra early sort. It is the best early wrinkled pea yet produced. It grows about three feet high, is very productive; the well-filled pods are as large as those of Gradus, and of a darker color. Pkt., 10c.; pt., 20c.; qt., 40.; pk., \$2.75.

Gradus. The most attractive novelty of recent years. Large, handsome pods, resembling Telephone in size and shape, well filled with large peas, tipening with the earliest. Habit vigorous, very quick to germinate and push to maturity. Foliage large, pale green in color, pods long, straight, and slightly rounded at the point. Seed large, wrinkled, cream-colored. Height, three feet. One of the earliest of all wrinkled peas. Pkt., 10c.; Pt., 20c.; Qt., 40c.; Pk., \$2.75.

Dwarf Telephone or Daisy. Season medium. Pods long, remarkably well filled, color pale green, peas large, tender, and of delicious flavor. Pt., 20c.; Qt., 35c.; Pk., \$2.00.

TOMATO.

Best of All. One of the earliest tomatoes in cultivation. Fruit of medium size and of brilliant red color. Slightly corrugated when grown in the field; when grown under glass it is perfectly smooth. Very prolific and a fine, delicate flavor. Pkt., 15c.; Oz., 40c.

Freedom. Fruit is borne in clusters, perfectly round, dazzling scarlet. The flesh is very solid, having but few seeds. The most prolific of all early tomatoes and equal in size and quality to any early sort on the market. Pkt., 10e.; Oz., 30e.

FLOWER SEED SPECIALTIES.

ASPARAGUS.

- Plumosus Nanus. This graceful climbing asparagus has taken the place of smilax in nearly all fine decorations, as it is much more graceful, its foliage being finer than that of the most delicate fern. It makes a fine house plant, and the foliage will last cut from two to three weeks. Pkt., 20c.
- Sprengeri. One of the best basket plants for house, greenhouse, or outdoor culture in summer. The fronds are now considered indispensable in all fine decorations. Grows readily from seed. Pkt., 10c.

MIGNONETTE.

Evans' Boston Giant. The finest strain of mignonette in the Boston market. Originator's seed. Pkt., 20c.; Oz., \$1.50.

PETUNIA.

Howard's New Star. A free growing and very profuse blooming strain, the result of many years' selection and cross-fertilization. The ground color is a rich, velvety, dark crimson maroon, on which is a beautiful five-pointed star varying from blush to pure white in color and extending from the center to the margin of the flower, where it deepens in color and blends beautifully with the dark ground. Per Pkt., 15c.

SHASTA DAISY.

Introduced by Mr. Luther Burbank, the noted horticulturist of California. The flowers are extremely large and graceful, with three or more rows of petals of the purest glistening whiteness on single, strong, wiry stems nearly two feet in length. Pkt., 25c.

STOCKS, MAMMOTH CRIMSON COLUMN,

This is identical with the well-known **Mammoth White Column** in growth and habit, but is of a rich bright crimson color. The flower spikes are large and well covered with enormous double flowers, and its brilliant color makes it a valuable variety for the florist and the private gardener. Pkt., 10c.; Oz., \$6.00.

SWEET PEAS.

- BLACK KNIGHT. Flowers of large size and fine, bold form; standard a rich wine brown or dark claret; wings heavily shaded with brownish purple. The effect is very dark and rich in coloring, turning almost black when fully opened.
- COUNTESS CADOGAN. Very large flowers, which when first opening resemble those of Captain of the Blues; but as they open further change to a light bluish purple in standard and clea. blue in wings. The color effect is that of a bright blue, fading to a lighter blue as the flowers remain open; very effective in shade and attractive in form. The nowers are of the largest size and borne three on a stem.
- EMILY LYNCH. A fine large flower, beautifully shaded and of excellent substance; the full rounded s'andard is slightly booded and of a deep rosy pink shade wings flat and widely spread, suffused with soft rosy pink.
- GOLDEN GLEAT. Fine large flowers, with broad and well-rounded standard of silky texture; color, creamy yellow.
- LADY GRISEL HAMILTON. Most attractive light lavender shading; flowers of fine booded form and extra large size. Standard light navender with azure blue wings; very light and dainty in effect.
- LADY MARY CURRIE. A deep orange pink, delicately shaded rosy lilac.
- MONT BLANC. The earliest pure white, flowers large, stems long. Highly recommended.

- NAVY BLUE (Burpee's). The richest and most distinct shade in dark-colored Sweet Peas. The large flowers are of a rich, glowing violet purple, having the effect of a dark navy blue, although, on a close examination, the standards have a faint tinge of claret or wine red.
- PINK FRIAR. One of our finest introductions, and a fitting companion to the beautiful Gray Friar. The coloring is a soft carmine rose, delicately suffused on a silvery or crystalline white ground.
- **SALOPIAN.** Deep crimson, tinged with mulberry red, suffused with rich orange scarlet.
- SADIE BURPEE. Flowers are of the very largest size and purest snowy white. The difference from Blanche Burpee is chiefly shown in the taller standard, which is also more pronounced in its hooded character. The large flowers come in threes a. the summit of a stiff stem, and are of firm substance, lasting well when cut. It is the finest as well as the largest pure white for cut flowers and exhibition purposes.
- STELLA MORSE. A most distinct shade, the flowers being heavily tinted with rich apricot as in Safrana and Sunset Roses. The color effect is deeper and richer than in any other of the creamy yellow varieties; has a faint tinge of pink underlying the creamy shading, producing a true apricot shade. One of the most desirable varieties of cut flowers.

Each, per Pkt., 5c.; per Oz., 10c.

DAHLIAS.

These grand, fall-blooming plants delight in a sunny situation and rich soil. They should not be set out till May. Lift the bulbs immediately after the first frost. Dry off and store during winter in dry sand in a warm place.

Our collection of Dahlias embraces only the very best varieties. Undernoted are a few of the leading sorts. Plants ready to send out about May 1st.

Show and Fancy.

Apple Blossoms. A very pretty new variety that combines all the shades found in the apple blossoms.

A. D. Livoni (Ethel Vick). Soft seashell pink; quilled petals; full to the centre.

Arabella. Pale primose, tipped and shaded rose and lavender.

Dr. J. P. Kirkland. Dark crimson. Keystone. Pink, striped crimson.

Mrs. Langtry. Yellow, deeply edged with crimson.

Mrs. Dexter. Salmon.

Miss Miller. Pale yellow, shading darker.

Meteor. Bright red, very large.

Orator. Salmon buff.

Pearl. White, deeply edged with rose.

Puritan. White, striped maroon.

Queen Victoria. Canary yellow.

10c. each; \$1.00 per doz.

Alice Emily. Buff yellow, large and fine.

Arian. Crimson scarlet.

Fascination. Rose pink, sometimes striped white.

John Thorp. White at base, deeply edged with pink.

Lucy Faucett. Pale yellow, striped magenta.

Margaret Bell. Magenta.
Robert Broomfield. Pure white.
Statesman. Deep crimson.

15c. each; \$1.50 per doz.

Cactus.

Beatrice. Pale rose.
Captain. Soft red, tinted apricot.
Cannell's Gem. Deep orange.
Dr. Jameson. Deep crimson.
Earl of Pembroke. Bright plum.
Ernest Glasse. Purple magenta.
Harmony. Reddish bronze.
Innovation. Rich crimson, tipped pure white.

Island Queen. Light mauve.
Keyne's White. Pure white.
Mrs. Chas. Turner. Clear soft yellow, very large.
Mrs. M. A. Holbroke. Velvet crimson.
Mrs. Bennett. Soft crimson.
Mrs. Barnes. Pale primrose.
Startein Krone. Cardinal red.

15c. each; \$1.50 per doz.

Cactus. Continued.

Arab. Rich, velvety maroon, almost black.

Brumhilde. Rich plum color.

Bedenia. Clear bright orange, striped and flaked red.

Britannia. Soft salmon pink.

Countess of Lonsdale. Deep salmon red. One of the best.

J. Weir Fife. Very dark maroon.

Kriemhilde. Pleasing shade of pink, centre almost white; extra fine.

Mayor Tuppeny. Orange-fawn, centre yellow.

Mary Service. Pinkish apricot.

Octopus. Nearly white, showing a tinge of lavender; very large.

Porcupine. Scarlet maroon.

Prince of Yellow. Soft shade of yellow. Queen Alexandra. Deep orange distinct.

Standard Bearer. Fiery scarlet.

Stella. Rich, vivid crimson.

Wm. Treseder. White, shaded pink.

25c. each; \$2.50 per doz.

Clara G. Stedwick. Clear, bright salmon, shading yellow at base of petals. Flamingo. Clear flame color.

General Buller. Rich velvet crimson, nearly black at base, with white tips.

Jealousy. Clear yellow.

King Edward VII. Bright cherry red.

Mrs. J. H. Luscomb. Rose mauve with a light centre.

Monarch. Orange red, tipped magenta. Richard Dean. Vermilion scarlet, blotched and tipped white.

Vesta. Clear shade of pink.

35c. each; \$3.50 per doz.

Decorative.

Amphion. Chrome yellow shaded cherry

Beauty of Brentwood. Plum color, striped darker.

Clifford W. Bruton. Bright yellow. Delicata. Light salmon, shading to pink. Dolly. Flesh color.

Grand Duke Alexis. Pure white, edged lavender, 20c.

Germania. White, tinted flesh.

La Favorite. White.

Lyndhurst. Fiery scarlet.

Miss Barry. Deep magenta.

Maid of Kent. Cherry red, tipped white. Nymphæa. Clear shrimp pink, tinted lighter. (Water Lily Dahlia.)

Oban. Mauve.

Wm. Agnew. Rich, dazzling red.

Zulu. The black dahlia. Dark maroon.

10c. each; 1.00 per doz.

Pompon.

Ariel. Orange buff. Bobby. Plum color. Catherine. Bright yellow. Darkness. Dark maroon. Fascination. Pink and lavender blotched white.

Little Jennie. Primrose yellow.

Little Bessie. Creamy white. Purity. Pure white.

Prince Charming. Cream, tipped purple. Red Indian. Deep coral red.

Star of the East. Clear white distinct.

Vivid. Bright scarlet.

10c. each; \$1.00 per doz.

GLADIOLUS.

This is one of the most extensively grown bulbous plants that adorns our gardens in the fall. The soil should be rich, thoroughly forked, cultivated and well drained. The bulbs should be planted four inches deep and about six inches apart.

Our mixtures are made up from fine varieties, and are all selected first size bulbs, and are sure to give the best results. America. A new variety now offered for the first time, but which has Each. Doz. been thoroughly tested, and is conceded to be one of the very finest varieties for cutting or bedding ever sent out; color a beautiful soft flesh pink; growth and general habit perfect .25 \$2.50 Good sized flower, well arranged on straight spike, color dark violet bordering on blue 25 2.50 Jane Dieulafoy. in most pleasing contrasts

of Papilo Major, practically unknown .

When seeds are ordered to be sent by mail, customers will please remit eight cents per pound or fifteen cents per quart, to cover cost of postage, except for packets and quantities less than one quarter pound, which we will mail free of postage.

ARTICHOKE. (Artischoke.)

One ounce will produce 500 plants.

The Globe Artichoke is cultivated for its flower-heads, which are cooked like Asparagus. Plants set in any good garden soil, about three feet apart, with slight covering in winter, will remain in bearing along time. Pkt. Oz. Lb.

The best variety; heads large and scales Large Green Globe. tender and excellent .10 .30 3.00 Jerusalem Artichoke. (Helianthus tuberosus). Cultivated for its Qt., .20 Peck. 1.00 tubers.

ASPARAGUS. (Spargel.)

One ounce will produce 200 plants.

A deep, rich, mellow soil is best adapted to the growth of asparagus. It may be grown from seed or propagated by roots. Sow as early in the Spring as the ground will admit, in drills from twelve to fourteen inches apart, and cover one inch deep; when the plants are well up, thin to three inches apart in the drills. Keep the plants free from weeds during Summer, and protect slightly during Winter.

The following Spring, the roots will be ready to transplant into permanent beds; the roots should be set in rows three to four feet apart, and one foot apart in the rows; the

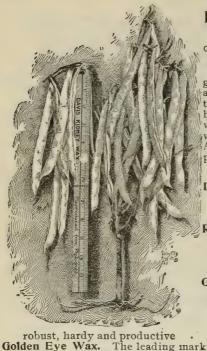

crown of the root should be four to six inches below the surface of the ground. A fair crop may be expected the third year from the seed, or in one to two years when roots are used, according to the age of the roots planted. By planting two-year old roots a fair crop may be obtained in one year, and after that a full crop every year.

Two-year old Asparagus Roots are too bulky to send by mail. The prices quoted for one-year old roots include postage; two-year old roots by express at the expense of the purchaser.

BEANS, DWARF OR BUSH.

(Busch-Bohnen.)

One quart will plant 100 feet of drill. One and one-half bushels will plant one acre.

A warm, light soil is best adapted to the growth of Bush Beans, but they will do well in almost any situation, unless it be very wet. Sow two inches deep in drills three to three and onehalf feet apart; keep the ground free from weeds and cultivate often. Never disturb the vines when wet, as the pods will become rusty. All the varieties are tender, and must not be planted until the soil is dry and warm.

BEET. (Runkel Rube.)

One ounce will sow 50 feet of drill; five to six pounds for an acre

A deep, light, sandy loam that has been well enriched is best adapted to the growth of the beet. Sow in drills, from April to June, sixteen inches apart, and about one inch deep; thin the plants to about six inches apart. The turnip-rooted are the best, and all early varieties are used extensively for greens.

ECLIPSE BEET.

Grey's Blood Turnip. One of the very best strains for Market Gardeners, small top, round, handsome, and very dark red. Pkt. 5c. Oz. 10c. Lb. 75c.

Eclipse, Early globe shaped, dark red, small top, smooth roots.

Pkt. 5c. Oz. 10c. Lb. 60c.
Edmands. Deep blood-red color, round and smooth; excellent quality; highly recommended. Pkt. 5c. Oz. 10c. Lb. 60c.
Dirigo. A rich blood-red variety, of

fine grain and flavor. Extra early.

SUGAR BEETS AND MANGEL WURZEL.

Six pounds of seed will sow one acre.

Lane's Improved Sugar Beet. Large, hardy, productive and excellent quality. Oz. 10c. Lb. 40c.

Silesia White Sugar Beet. Grows to a large size, and is useful for making surar, as well as for stock-feeding. Oz. 10c. Lb. 40c.

Grey's Prize Long Red Mangel. The most largely grown of any of the Mangels; roots attain an enormous size, producing thirty to fifty tons to the acre; quality superior; the best for deep soil. Oz. 10c. Lb. 40c.

Golden Tankard Mangel. The flesh is bright goldenyellow; very large, and will produce more mangels to the acre than any other variety; excellent for feeding stock. Oz. 10c. Lb. 40c.

Gian. Yellow Intermediate Mangel. A very large yellow sort, of good quality, and produced in great abundance. Oz. 10c. Lb. 40c.

Yellow Globe. A large, round, orange colored variety of excellent quality: good keeper; best for shallow soil. Oz. 10c. Lb. 40c.

BORECOLE, or KALE. (Blatter Kohl.)

One ounce will produce 1500 plants.

Of all the cabbage tribe this is the most tender and delicate. Early plants may be started in the hot-bed, or the seeds may be sown in the open ground in April or May; transplant in June, into rows, and cultivate the same as cabbage.

Dwarf Green Curled. One of the best; very hardy and improved Pkt. Oz. Lb. by a moderate frost .10 .75 German Greens, or Sprouts. Sow in the Fall in rows one foot apart and cultivate like Spinach. A very hardy variety and .05 .10 .75 much esteemed by market gardeners Large-Seeded Spring. Used only for early greens, and should be

sown in rows eighteen inches apart, as early as the ground .10 can be worked .30

BRUSSELS SPROUTS.

CABBAGE. (Kopfkohl.)

BROCCOLI. (Spargel Kohl.)

One ounce will produce 2,000 plants.

This vegetable closely resembles the cauliflower. A very rich deep soil is required to grow the broccoli to perfection; the seed should be sown early in the Spring, and the plants transplanted into rows three feet apart with two feet between the plants.

Early Purple Cape. Heads of a greenishpurple color; close and compact, and of fine flavor. Pkt., .05; Oz., .40; Lb., \$3.00. White Cape. Heads compact, good size, and of a creamy white. Pkt., .05; Oz., .40; Lb., \$3.00.

BRUSSELS SPROUTS.

(Sprossen Kohl.)

One ounce will produce 2,000 plants.

Cultivated for the small heads that grow from the main stem; these small heads are firm and compact like little cabbages, and are considered a great delicacy by many people.

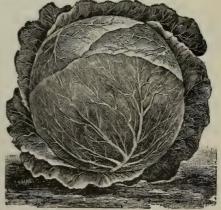

Cultivate the same as cabbage or cauliflower.

Improved Dwarf French. Tender and of fine flavor; the best for general use.

Pkt., .05; Oz., .20; Lb., \$2.00.

Tall French. Grows taller than the above; is of good quality and very productive. Pkt., .05; Oz., .20; Lb., \$2.00.

tender, medium size	.05	.25	2.50

CARROT. (Moehre.)

One ounce will sow 100 feet of drill; three pounds required for one acre.

The carrot flourishes best in a good, light, well-enriched loam. Where there is a choice of situations, heavy and wet soils should be avoided, and preference given to the light and dry. For an early crop sow as soon as the ground is in good working condition; plantings for general crop may be made as late as June, but early sowings succeed best. early, small-sized varieties may be sown in drills ten inches apart, but the larger sorts require at least eighteen inches between the rows; cover three-quarters of an inch deep. and when the plants are well up, thin to six. inches apart in the rows. As an agricultural root, the carrot is unsurpassed for feeding stock.

	CARROT.

	Pkt.	Oz.	Lb.
Earliest French Forcing. A small round root; the earliest variety and good for forcing under glass			1.00
Early Scarlet Horn. A medium-sized root, half-long, of fine color,

Guerande. Intermediate in length; fully three to five inches in diameter; fine quality	.05	.10	1.00
Danvers Half-Long. The best variety for general crop; is of rich color and a good keeper; yields largely and is easily har-			
vested	.05	.15	1.25
Improved Long Orange. The best known and most largely cultivated of any carrot; excellent for stock or table use; roots			
deep orange, twelve to fifteen inches long	.05	.10	1.00
Improved Short White. The largest and heaviest cropping carrot			
known; the roots are short, very heavy at the shoulder, of uniform shape and smooth	.05	.10	1.00
Early Chanteney. The best sort for bunching, stump rooted, and			1 00
a good color at all stages of growth	.05	.10	1.00

CAULIFLOWER. (Blumen Kohl.)

One ounce will produce 3,000 plants.

The cauliflower, like the cabbage, requires a deep, rich soil, and seldom succeeds well when grown on land long under cultivation. Sow the seed in the hot-bed in March, and transplant into the garden in May; set the plants in rows and cultivate the same as cabbage. If the season is dry, water often, as cauliflowers cannot be grown to perfection without plenty of moisture.

	Pkt.	Oz.	½ Lb.
Early Snowball. A favorite early variety, very sure to head;

well protected by foliage; will remain suitable for use a long			
time	.10	.50	1.25

CELERY. (Seleri.)

One ounce will produce about 4,000 plants.

Sow the seeds in March or April in a hot-bed or cold frame. As soon as the plants are three inches high, transplant into a prepared border, setting them four inches apart. When grown six inches, and fine stocky plants, set in richly-manured, deep soil, in rows three and a half feet apart, and about nine inches from plant to plant. Water, if dry weather follows transplanting. During the next two months all the attention required is to keep down weeds. Afterwards earth up a little, and continue doing so at intervals until only the tops of the leaves are visible late in autumn. Never her or earth up when the plants are wet

to keep down weeds. Afterwards earth up a li	ttle, an	d con	tinue
doing so at intervals until only the tops of the	leaves	are v	isible

CORN SALAD, or FETTICUS. (Ackersalat.)

Cne ounce will sow 100 feet of drill.

This excellent salad may be had the year round. Sow in September, in drills eight inches apart, covering the seeds lightly and protect from frost by a light covering of hay or litter. The seed may also be sown in spring.

Large-Seeded. The most popular variety grown. Pkt. 5 cts. Oz. 10 cts. Lb. \$1.00.

CRESS, or PEPPERGRASS. (Kresse.)

One ounce will sow 100 feet of drill.

A popular salad, which should be sown early in spring—very thickly in shallow drills—and at short intervals, for succession, as it soon runs to seed.

Extra Curled. The best variety grown; leaves are beautifully cut and curled; highly prized for garnishing. Pkt. 5 cts. Oz. 10 cts. Lb. 60 cts.

Water. This wholesome salad may be grown in any moist situation, but more successfully by the edge of a running brook. The seed may be sown in May, on the ground where it is intended to be grown, and the thinnings transplanted. The plants should be set not less than a foot apart. The cress will be fit for gathering the second year. Pkt. 10 cts. Oz. 40 cts.

CHERVIL. (Kerbel.)

The Curled Chervil is cultivated like Parsley, and used for garnishing and flavoring soups and salads.

Curled Chervil. The young leaves are used for flavoring soups and salads. Pkt. 5 cts. Oz. 10 cts. Lb. \$1.00.

Pkt., 25 cents each.

DANDELION. (Lowenzahn.)

One ounce will sow 200 feet of drill; one pound will sow an acre.

Extensively used as early spring greens, and considered very healthful. Sow seed in May or June, in any good soil, in drills fifteen inches apart, upon beds made smooth with the rake. Cover very lightly and press the earth firmly upon the seed. Cultivate during the summer to keep down the weeds. Cover with litter upon the approach of severe weather, and remove the covering early in spring. If spare frames are at hand, they may be used to advantage by set-

ting them over a portion of the bed, and forcing the dandelions under them, thus forwarding a portion of the crop. Dandelions make an excellent salad if blanched by earthing-up, or placing boards to exclude the light.

American Improved. A stocky, thick leaf, hardy variety, grown largely for the Boston market; the best for general use. Pkt. .10; Oz. .40; Lb. 4.50.

EGGPLANT. (Eirpflange.)

One ounce will produce 1,000 plants.

Sow in hotbeds very early in spring, and transplant when two inches high into a second bed or into small pots. If that is not done, thin to four inches apart. Do not plant out till the weather becomes perfectly settled and warm. Cool nights or wet weather will check them. Keep some back in frames for a second planting, in case of weather changing unexpectedly. Keep plants watered for a few days if the sun is hot when put out. Set out plants 3 feet by 2.

Black Pekin. Fruit globular, almost black in color, fine grained, and delicately flavored. Pkt. 10 cts.
Oz. 40 cts.

Early Long Purple. A very early, hardy and productive variety of good quality. Pkt. 10c. Oz. 25c.

New York Improved. The best sort for general culture, and leading market variety; fruit large oval, very productive. Pkt, 10 cts. Oz. 40 cts.

NEW YORK IMPROVED.

ENDIVE. (Endivien.)

One ounce will sow 150 feet of drill.

A rather moist soil is preferred. Sow early in the Spring in drills twelve inches apart, and thin out the plants to ten inches apart in the drill as soon as they are large enough to handle. Before using the plants must be blanched, which is accomplished by gathering the leaves to a point at the top and tying them together with matting or any soft material. It makes a most delicious salad.

Green Curled A warm handy dark green closely curled maniety	Pkt.	Oz.	Lb.
Green Curled. A very hardy, dark green, closely curled variety, tender and crisp	.05	.20	2.00
Moss Curled. Beautifully curled, and when well developed resembles a tuft of moss; the most ornamental of all	.05	.20	2.00
Broad-Leaved Batavian. Leaves very broad; color light green, requires to be tied up for blanching; used principally in soups	.05	.20	2.00

KOHL=RABI.

One ounce will sow 200 feet of drill.

This vegetable, the popularity of which is rapidly increasing, combines the virtues of the turnip and cabbage, but excels both in nutritive, hardy and productive qualities. The seed may be sown in June in rows eighteen inches apart, and the plants thinned out to eight or ten inches.

White Vienna. The earliest and best table or market variety. Pkt. 5cts. Oz. 25cts.

Lb. \$2.00. Purple Vienna. e Vienna. Similar to the preceding, except in color, which is of a bluish purple. Pkt. 5 cts. Oz. 25 cts. Lb. \$2.00.

LEEK. (Lauch.)

One ounce will sow 100 feet of drill.

The Leek is very hardy, and easily cultivated; it succeeds best in a light, but well-enriched soil. Sow as early in Spring as practicable, in drills one inch deep and one foot apart. When six or eight inches high, transplant in rows ten inches apart each way, as deep as possible, that the neck, being covered, may be blanched.

American Flag. The most desirable for market or family use. Pkt. 5 cts. Oz. 20 cts.

Lb. \$2.00.

Musselburgh. A very large variety of superior quality. Pkt. 5 cts. Oz. 20 cts. Lb. \$2.00.

LETTUCE. (Lattich Salat.) One ounce will produce about 3000 plants.

Lettuce succeeds best in rich and comparatively moist soil, and is most crisp and tender if grown in cool, moist weather. The more rapidly the plants are grown, the more tender and brittle will be their quality. For early use, sow under glass, in February or March, and transplant into a previously prepared hot-bed; rows at least twelve inches apart, according to the varieties. Sowings may be made in the open ground as soon as all danger from frost is over; and if a continuous supply is desired during the season,

make sowings every two or three weeks,	until Pkt.	Septer Oz.	mber.

MARTYNIA. (Gemsenhorn.)

One Ounce will plant 100 hills.

One ounce will plant 60 hills, two to three pounds for an acre.

Cultivate in hills, which should be five to six feet apart each way, and composed of light, moderately rich soil. The hills should be dug about two feet square, eighteen inches deep, and half filled with well-rotted manure, which must be thoroughly incorporated with the soil. Plant in May, ten seeds to the hill, and when the plants are well up, thin out to three. Cultivate until the vines cover the ground, and pinch the ends of the growing shoots to induce early fruiting.

MUSHROOM. (Champignon.)

One pound of spawn is sufficient for nine square feet of bed.

If wanted by mail, add 10 cents per lb. for postage.

Mushrooms are more easily cultivated than many people imagine, and may be grown in any dark room or cellar where the temperature can be maintained at from fifty to sixty-five degrees. For the bed, use a mixture of horse droppings and good fresh loam in equal proportions. Before being placed in the bed let this material be thoroughly mixed, ard well turned three or four times to sweeten in some dry place. Upon a dry, firm bottom, proceed to make the bed, by spreading a thin layer of the prepared mixture and pound it firm till the bed is eight inches thick. Leave it thus for about a week, or till the temperature of the bed has subsided to ninety or ninety five degrees. Then make holes about the size

of an egg. Cover the holes and press the soil solid and smooth. Let the bed remain in this condition ten days. Then cover with two inches of fresh loam. Over this place a few inches of straw. If the temperature is right, mushrooms will appear in six to eight weeks from time of spawning. The bed will continue bearing about a month. After the first crop is gathered, spread over the bed an inch of fresh loam, and moisten with warm water. In the event of the surface of the bed getting very dry at any time, it should be moistened freely with water at a temperature of eighty to eighty-five degrees.

Our Celebrated English Milltrack Mushroom Spawn (made by the best maker in England especially for our trade) has gained an enviable reputation among critical growers for its uniform good quality, and can be thoroughly relied on to produce a good crop of the best mushrooms. Lb. 12 cts. 50 lbs. 5.00 100 lbs. \$9.00.

MUSTARD. (Senf.)

One ounce will sow 50 feet of drill.

As an ingredient, the green Mustard imparts a delightfully pungent flavor to the various forms of prepared salads. For early crops the seed may be sown in a hot-bed in March, and for general crop at frequent intervals through the spring, in drills from eight to twelve inches apart.

White. The best variety for salads; the seed is also used medicinally, and as a seasoning for pickles. Pkt. 5 cts. ¼ 1b. 10 cts. Lb. 25 cts.

Brown. An esteemed sort for culinary use. Pkt. 5 cts. 1/4 lb. 10 cts. Lb. 25 cts.

New Chinese. Leaves twice the size of the white mustard; stems more succulent, of deeper green; flavor pleasantly sweet and pungent. Pkt. 5 cts. Oz. 15 c.s.

Lb. \$1.00.

NASTURTIUM or INDIAN CRESS.

One ounce will sow 20 feet of drill.

The Nasturtium is both ornamental and useful, the tall variety forming a showy and graceful climber, and the dwarf an exceedingly beautiful and attractive border flower, while the young seeds of either, when pickled, furnish an excellent substitute capers. Sow the seeds in drills one inch deep; the tall should be grown by the side of a fence or supported by a trellis.

White Velvet.						.10	.75

ONION. (Zwiebel.)

One ounce will sow 100 feet of drill. Four or five pounds to the acre.

The onion thrives best in a light, loamy, mellow, soil; and unlike most kinds of garden vegetables... succeeds well when cultivated on the same land for successive years. The seed should be sown as early in the Spring as the ground is in good working condition, in drills fourteen inches apart, and covered one-half inch deep. When the plants are three inches high, thin to two inches apart. Keep free from weeds, but be careful not to disturb the growing bulbs. A top dressing of wood ashes, applied after the second weeding, is very beneficial to this crop, as will soon be observed by the dark and healthy change of color given to the plants. The onions will ripen early in September, and after being gathered and exposed to the sun a few days for drying they will be ready for storing or the market.

	Pkt.	Oz.	Lb.
Yellow Globe Danvers. Our strain of this superior variety is un-			
surpassed; selected with the greatest care; the true shape

Potato Onions. These are considered a little earlier		
than the white and vellow sets	.20	1.00

PARSLEY. (Petersilie.).

One ounce will sow 150 feet of drill.

Parsley succeeds best in rich, mellow soil, and as the seed vegetates slowly—sometimes remaining in the earth four or five weeks before the plants appear—the sowing should be made as early in spring as the ground is in working condition. When the plants are two or three inches high thin them out to eight or ten inches apart, being careful in the thinning to leave only the best curled plants. The leaves of the curled varieties afford one of the most beautiful of garnishes; they are also used for flavoring soups and stews.

edgings	.05	.10	.75
Fern Leaved. Very beautiful; more like crested fern or moss than	0*	10	
parsley; grand for table decoration		.10	.75
of its mossy appearance and its bright color		.10	.75

PARSNIP. (Pastinake.)

One ounce will sow 100 feet of drill. Five to six pounds to the acre.

Sow in April or early in May, as parsnips require a long season to mature. Their cultivation is otherwise the same as directed for carrots. They may be dug in the autumn and stored for winter use, but if left in the ground till the following spring they are very much improved in flavor. Sow a liberal quantity of seed, as from its nature it does not always come up well.

	Pkt.	Oz.	Lb.

Early Round. The earliest variety in cultivation, of good flavor but of small size	.05	.10	. 60

PEAS. (Erbse.)

One quart will sow 100 feet of drill; one and one-half bushels per acre.

GREY'S PERFECTION.

The Pea comes earliest to maturity in light, rich soil. Sow as early as the weather will permit, in drills two to three and one half feet apart, and cover three inches deep. Forgeneral crops a good dressing should be applied, and for the dwarfgrowing kinds the soil can hardly be made too rich. For a continuous supply during the season, sowings should be made from early in April until the middle of June; planting should then be discontinued until the middle of July, when a good crop may sometimes be secured by sowing an extra early sort. The crop should be gathered as it becomes fit for use.

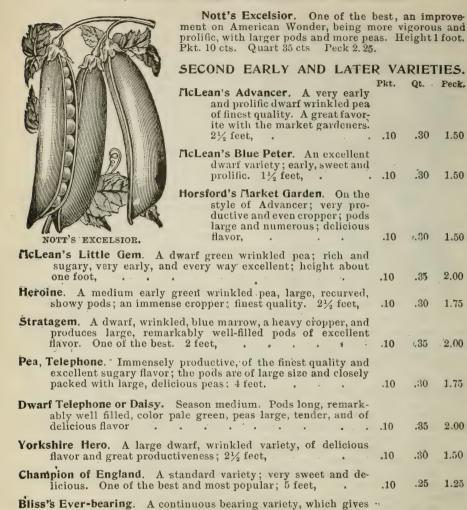

All wrinkled Peas are superior to, more delicate in flavor, and remain longer in season than the smooth sorts, but should not be sown until the ground becomes warm, for, as in sugar corn, the wrinkled appearance indicates the greater amount

of saccharine matter. We contract annually with growers of reliability and experience, who raise our supplies from the finest and most carefully selected seed stocks in the country. We cordially invite growers for market and all others to call and examine ours when in need of true, pure and fresh seed Peas.

EXTRA EARLY VARIETIES.

Duby King Long about five inches: very thick; line, mild havor,	.05	.25
Squash. Flesh thick, mild, and pleasant to the taste, though more	-14	20
piquant than some,	.05	.30
Sweet Mountain. Grows to large size; shape somewhat like the Bell,	05	0.5
but much larger; much used for pickling,	.05	.25

POTATOES. (Kartoffel.)

Eight to ten bushels will plant one acre.

A good, sandy loam produces the best potatoes, but they can be grown on all kinds of soil. New or pasture land, with the turf freshly turned, produces the finest crop. Make furrows of good depth, three feet apart. Scatter a liberal dressing of phosphate or decayed stable manure along the drill, and set the seed about ten inches apart in the rows. Cover with about two inches of soil, and begin to cultivate when the plants are well up. At each successive hoeing, bring additional soil about the plants.

The necessity of changing Potato Seed is universally admitted by all well posted growers. By using our Northern Grown Seed you are assured of early maturity, increased yield and a vigorous growth.

Beauty of Hebron. A very productive variety of fine quality; good either as an

early or general crop potato.

Clark's No 1. Similar to Early Rose but more productive, slightly larger and more mealy. A first class potato in every respect.

Early Ohio. One of the earliest; tubers almost round and very solid; good either

for table or market purposes. Early Rose. The well known variety; early and prolific. Our stock is of the desirable "Houlton Rose" seed.

New Queen. Flesh white and quality unsurpassed; Early and productive. In shape and color it resembles the Beauty of Hebron.

Pearl of Savoy. Flesh white and mealy; a large yielder, and vigorous grower; a desirable early variety. LOWEST MARKET PRICES. Write for Quotations.

POTATOES—Continued.

American Wonder. Skin pure white; very fine grain and excellent quality; heavy yielder.

Carman No 3. The handsomest large White Potato; heavy yielder of excellent quality.

Bliss' Triumph, a well known early sort, of superior quality and excellent flavor.

LOWEST MARKET PRICES. Write for Quotations.

PUMPKIN. (Curbis.)

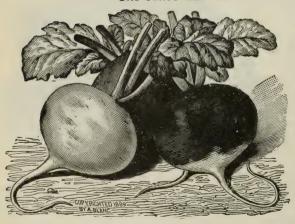

One ounce will plant 20 hills. One pound 250 hills.

Sow in good soil in May, when the ground has become warm, in hills eight or ten feet apart each way; or in fields of corn, about every fourth hill. The pumpkin is not so particular in regard to soil as the melon or cucumber, but in other respects is cultivated in a similar manner, though on a larger scale. If planted in hills by themselves, thin out the plants when beginning to run, to three in each hill.

Constitut Field Allows allows with an about a little	Pkt.	Oz.	Lb.
Connecticut Field. A large yellow variety, productive and largely grown for feeding stock,	.05	.10	.50

Mammoth. A productive variety, which grows to an immense size, often weighing more than a hundred pounds,	.10	.20	2.00
Nantucket, or Negro. An exceedingly prolific variety of dark green color. It has a hard shell, and is one of the sweetest			
pumpkins in civilization,		.10	1.00
Sugar. A small fine-grained, sweet pumpkin; very prolific, and a fine table variety,	.05	.10	.60

RADISH. (Rettig.)

One ounce will sow 100 feet of drill.

For early use sow in the hot-bed in February or March and in the open ground as soon as it can be worked. Sow in rich, mellow soil, in drills about fourteen inches apart, and thin out the plants to three inches apart in the drills. For a continuous supply during the season, make sowings every two weeks, as the early sown plants become rank and unfit for use as they increase in size. Radishes to be crisp and tender, must be grown quickly and be frequently watered if the weather is dry.

Constat Globa Of distinct chang brilliant color origin and white.	Pkt.	Oz.	Lb.

monton and preparation of the second		-10	.,,
RHUBARB. (Rhabarber.)			

One ounce will produce about 750 plants.

Rhubarb succeeds best in deep, rich loam; the richer its condition, and the deeper it is stirred, the better, as it is scarcely possible to cultivate too deeply or to manure too highly. It is propagated by seeds, or by division of the roots—the latter being the usual method. Sow the seed in drills eighteen inches apart, and thin out the plants to nine inches apart in the drills. When the plants are one year old transplant into beds, setting the plants five feet apart each way. Do not cut until the second year and give a liberal dressing of manure every Fall.

Linnæus. The earliest and best for garden use; not as coarse and fibrous as the larger sorts	b.
	00
Victoria. The variety in general use for the market; yields im-	20

SALSIFY or OYSTER PLANT. (Haferwurzel.)

One ounce will sow 50 feet of drill, about seven pounds an acre-

A very delicate and nutritious esculent, especially esteemed for its peculiar oyster flavor. Sow the seed early in spring, in drills twelve inches apart and one inch deep, thinning out the young plant to six inches. The roots will be ready for use in October, when a supply should be taken up and stored like carrots. Those remaining will suffer no injury by being left in the ground till spring.

Mammoth Sandwich Island. Tender and delicious, very superior. Pkt. 5 cts. Oz. 15 cts. Lb. 1.50.

Long White French. Pkt. 5 ets. Oz. 15 ets. Lb. 1.25.

SPINACH. (Spinat.)

One ounce will sow 50 feet of drill. Twelve pounds will sow an acre.

Spinach may be grown on any ordinary soil. It is grown both as a spring and summer crop. For early use, sow in August or September, in drills twelve to fourteen inches apart. At the approach of cold weather cover lightly with straw, or any handy litter. Uncover when the plants begin to make a new growth in spring. For summer use, sow early in spring, in same way as above, using rather less seed. If the plants stand too thick, thin to three or four inches apart. A liberal dressing of good ma-

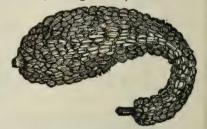

nure should be used. The land can hardly be made to rich.

· ·

New Zealand. Entirely distinct with very large seeds; makes a			
low spreading plant from which delicious, tender greens can			
be gathered the entire summer. May be started in a hot-bed			
and transplanted or sown out-of-doors when the ground is			
warm, allowing two feet between the plants,	.05	.15	.30
·			

SQUASH. (Speise Kurbiss.)

One ounce of the small seeded variety will plant 40 hills; of large seeded, 15 hills.

The squash is one of the most nutritious and valuable of all our garden vegetables. The Summer varieties come to the table early in the season, and are very palatable, while the Winter sorts can be had in perfection from August until the Summer varieties are again in condition. The young plants are very tender and sensitive to cold, and planting should be delayed until the ground is dry and warm. Plant in well-manured hills, in the

SUMMER CROOKNECK.

same manner as cucumbers and melons, the bush varieties three or four feet apart each way, and the running kinds from six to eight feet apart. Sow eight or ten seeds to a hill, thinning out, after they have attained their rough leaves, and danger from bugs is past, leaving two or three of the strongest plants in each hill.

Havana. Imported Seed. Pkt. 10 cts. Oz. 30 cts.

TOMATO. (Liebesapfel.) One ounce will produce 1,500 plants.

CRIMSON CUSHION.

This delicious vegetable is one of the most important of all garden products. The seed should be sown in a hot-bed about the first week in March, in drills five inches apart, and half an inch deep. When the plants are about two inches high, they should be set out four or five inches apart in another hot-bed, or removed into small pots, allowing a single plant to a pot. About the middle of May the plants may be set out in the open ground; they are planted for early crops on light, sandy soil, at a distance of three feet apart, in hills in which a good shovelful of rotted manure should be mixed. On heavy soil, which is not suited for an early crop, they should be planted four feet apart. Water freely at the time of transplanting, and shelter from the sun for a few

days until the plants are established. Sufficient plants for a small garden may be started by sowing a few seeds in a shallow box or flower pot, and placing it in a sunny window of the room or kitchen.

POT, SWEET, AND MEDICINAL HERBS.

No garden is complete without a few herbs for culinary or medicinal purposes; they are easily grown, and when preserved by drying, are ready for use at any season of the year. Plant in Spring, when the ground is warm, in drills, covering lightly. When the plants are well up, thin out or transplant to about four inches apart. They should be harvested on a dry day just before the blossom develops, dried quickly and bottled, or closely packed in dry boxes with the air entirely excluded.

GRASS SEEDS.

Prices subject to market fluctuations.

We make a specialty of Grass Seeds, and send out only the most useful varieties which are adapted to this country. All that we offer have been recleaned and will meet the views of the most critical buyers. Our prices are as low as the quality of seed we offer can be sold at, and should not be compared with the low prices quoted for inferior grades. We shall always be pleased to mail samples for comparison.

Timothy. (Phleum pratense.) One of the most important of the grasses, Lb. 100 Lbs. thriving best upon rich, heavy soils, where it remains permanent and produces heavy crops. Sow 25 lbs. to the acre when sown alone .10 6.00

Red Top. (Agrostis vulgaris.) A valuable native permanent grass, growing in almost any soil, moist or dry, and standing our hot climate. Sow 42 lbs. per acre, if alone

Red Top Fancy. Clean Seed. Absolutely clean and free from chaff . .15 12.00

GRASS SEEDS.—Continued.	Th	100 Lbs.
Rhode Island Bent. (Agrostis canina.) A fine, hardy, very compact grass; very permanent, readily forming a heavy sward; excellent for pastures. Sow 4 bushels per acre, if alone.(10 lbs. per bushel)		22.50
Kentucky Blue. (Poa pratensis.) Also called "June grass;" an early grass of much value; will do well upon any ordinary soil; stands the heat of summer remarkably well. For pastures and lawns it has no superior, giving that peculiar, rich shade of bluish-green so much admired in the best lawns; also making a very close, velvety turf. It is usually sown mixed with other fine grasses; when used alone, 30 to 40 lbs. per acre. Blossoms in June. Fancy clean seed.	.20	18.00
Fowl Meadow. (Poa serotina.) A valuable grass for wet meadows, where it will produce large crops of excellent hay after it has become well established. It thrives on such lands as are occasionally overflowed, but will not endure to remain under water for a long period, especially in hot weather. Blossoms in July or August. Sow 20 lbs. per acre	.25	20.00
Sweet Vernal, True Perennial. (Anthoxanthum odoratum.) Useful to		
mix with other grasses for lawns, in which it is invaluable on account of its early growth and the fragrant odor which it imparts to the other grasses when drying; very hardy and permanent	.65	60.00
Crested Dogstail. (Cynosurus cristatus) Good for permanent pasture for sheep, is productive and early, suffers but little from dry weather, and is one of the best grasses for lawns; thirty-five pounds		
to the acre	.35	30.00
Hard Fescue. (Festuca duriuscula.) Admirable pasture grass of fine quality; thrives well in dry situations; thirty pounds to the acre	.15	12.00
Meadow Fescue. (Festuca pratensis.) This is excellent for hay when sown with other grasses, such as Orchard Grass and Timothy, and is also considered one of the best grasses for permanent pasture on a great variety of soils; sow forty pounds per acre		5 12.00
Italian Rye Grass. (Lolium Italicum.) Thrives in any soil, yields an early and abundant crop, valuable for mixing with other pasture grasses; sow fifty pounds per acre	,	2 9.00
Perennial Rye Grass. (Lolium Perenne.) A nutritious permanent grass for meadows and pastures, or for mixing with other grasses for lawns; does well on all soils; sow fifty pounds per acre		0.00
fleadow Foxtail. (Alopecurus pratensis.) One of the best and earliest of pasture grasses; thrives best in moist localities; thirty pounds		9.00
to the acre	.30	25.00
Rough-Stalked Meadow Grass. (Poa trivialis.) Produces an abundant crop of highly nutritious herbage, valuable for either moist or dry soils; thirty pounds to the acre	.40	35.00
Sheep's Fescue. (Festuca ovina.) Is excellent for pasturage for sheep; is short and dense in its growth, making it valuable also for grass plots. Thirty pounds will sow an acre		15.00
Tall Fescue. (Festuca elatior.) Excellent for permanent pastures on moist soils, on which it yields immensely. Sow forty pounds per acre		

ORCHARD GRASS.

GRASS SEEDS—Continued.

Orchard. (Dactylis glomerata.) One of the earliest grasses; yields immense crops and is excellent for pasture or hay; should be cut as it is coming into bloom, and will produce a heavy second crop; one of the best grasses. Sow forty pounds per acre. Lb., 20c. 100 lbs., \$15.00.

Tall Meadow Oat Grass. (Avena elatior.) This grass produces an abundant supply of foliage, and is valuable for pasture on account of its early and luxuriant growth. It shoots up very quickly after being cut, and produces a thick growth of aftermath, which also makes it valuable as a soiling crop. Forty-five pounds sow an acre. Lb., 25c.; 100 lbs., \$20.00.

CLOVER SEEDS.

There are no plants so valuable for fertilizers as the clovers. They have the faculty of absorbing nitrogen from the air, and also of rendering available much of the inert plant food of the soil. Their long, powerful tap roots penetrate to a great depth, loosen the soil, admit air, and by their decay, add immensely to the fertility of the

, , , , , , , , , , , , , , , , , , , ,		
soil. The seed may be sown in Fall or Spring; the best results will come	from	sowing
in the Spring, and it is often sown on the late snows of April.	Lb.	100 Lbs.
Red Clover, Medium. (Trifolium Pratense.) The leading variety of		
clover for pastures or meadows. Sow in Spring or fall	.20	15.00
Red Northern, or Mammoth. Grows four to five feet high, and is used		
by some to plow under for manure	.20	16 00
Alfalfa, or Lucerne Clover. (Medicago sativa). Early, productive and		
lasting a number of years. Succeeds in good, deep soil.	.20	18.00
Alsike, or Swedish. (Trifolium Hybridum.) Hardiest of all the clovers		
and on rich moist soil yields an enormous quantity of hay or		
pasturage. Valuable for sowing with clovers or grasses, as it forms		
a thick bottom and increases yield of hay	.20	16.00
Crimson Clover. (Trifolium incarnatum.) An annual variety, largely		
used in the south for feeding green and for hay. The yield in		
fodder is immense, and after cutting it at once commences growing		
again and continues until cut by frost. Sow in April or May;	4.0	
ten to fifteen pounds to the acre	.10	8.00
White Dutch Clover. (Trifolium Repens.) The best variety for lawns,		
as it forms a close herbage and remains green throughout the	200	05 00
season; it is also valuable when mixed with grass seeds for pasture.	.30	25.00

MILLETS.

Millets should be sown in June and July, and are Annual forage plants of thick growth, valuable for green fodder or hay, maturing in fifty to seventy-five days from the time the seed germinates, producing an abundant yield of forage, relished by all kinds of stock. They must be cut while in blossom to make good hay.

German, or Golden. (Southern grown.) A valuable annual hay and fodder crop, more productive and coarser than the Hungarian grass; medium, early, four to five feet high. Sow one bushel to the acre. Bushel, \$1.75.

Common Millet. (Panicum Miliaceum.) Very early, two to three feet high, foliage broad, heads open, branching panicles. Bushel, \$1.50.

Japanese. (Panicum crus Galli). Grows taller and stools out more freely than the Common Millet; very productive. If sown early and cut, usually produces a good second crop. It has produced in Massachusetts, six tons dry hay per acre; highly recommended. Sow twelve quarts per acre. Lb., 10 cts.; bushel, \$2.50.

Hungarian Millet. (Panicum Germanicum.) An annual forage plant, early and productive, growing two to three feet high with an abundance of foliage, often yielding two to three tons per acre. Sow one bushel to the acre. Bushel, \$1.50.

CHOICE FLOWER SEEDS.

In the following pages we describe, arranged alphabetically, the leading Flower Seeds, including many New and Special flowers of unusual beauty. These Seeds are all of the fines, strains of the best varieties and are sure to give entire satisfaction. They are grown by flower seed specialists in America, England, Germany and France.

Inducements to Cash Buyers. On all orders for seeds in packets, accompanied by the money, purchasers may select twenty-five cents' worth extra for each dollar sent. Thus, any one sending us one dollar may select seeds in packets amounting to one dollar and twenty-five cents. For two dollars seeds in packets amounting to two dollars and fifty cents, and so on.

This offer does not include seeds by weight or measure, Bulbs or plants.

Feathered Cyclamen. "Bush Hill Pioneer" (Low.) First class certificates, Paris and Ghent, '97.

Diplome D'Honneur, Brussels, 1897. Flowers white, of considerable substance, with a strikingly distinct crest or feather of the same color upon the face of each petal. This, the first variety of its kind, is undoubtedly destined to be the forerunner of an entirely new strain of Cyclamen, the feather adding enormously to the substance and lasting properties of the flower, besides opening up the possibility of endless variety, by the introduction of a colored feather on the white ground, or a white feather on the colored ground. Pkt., 75c. 300.

CYCLAMEN GIGANTEUM.

No. 301.	CRUCIANELLA Stylosa. Pink, very pretty little perennial for borders. 3/4 ft	Pkt.

PRIMULA CHINENSIS.

PRIMULA CHINENSIS. Chinese Primrose.
This charming and beautiful flowering plant is indispensable for winter or spring decorations in the home or conservatory. It is one of our most important winter blooming pot plants. The seed we offer is of the highest merit and has, as usual, been saved from the best strains of English and Continental growth. The flowers are large, of great substance, and of the most beautiful colors and shades. The seed may be sown in spring or autumn. Transplant singly when large enough; re-pot as the young plants grow, in a compost of sandy loam, peat and rotted cow manure. plant is indispensable for winter or rotted cow manure.

674. Alba Magnifica. The finest pure white with bright yellow eye, beautifully fringed. Pkt. 50c.
675. Blue. Very fine shade; strikingly beautiful; desirable pot plant. Pkt. 50c.
676. Chiswick Red. Large brilliant scarlet, finely fringed. Pkt. 50c.
677. Pink Bright pink heautifully fringed.

677. Pink. Bright pink, beautifully fringed.

677. Pink. Bright pink, beautifully fringed. Pkt., 50s.
678. Finest Tixed. A splendid, large flowering, fringed strain, convaining the new and most distinct varieties and colors. Pkt., 50c.
679. Giant White. A superb variety, with enormous flowers. The flowers pure snow-white, with yellow eye; the petals broad, thick and beautifully fringed, of remarkably vigorous growth. Pkt., 50c.
680. Giant Rose. Elegant in habit, with a strong flower stalk rising clear above the foliage. The foliage is of

	above the foliage. The foliage	s of
	good substance, while the beautiful flowers, a light rose color, are of enormous size.

BULBS, ROOTS AND TUBERS.

FOR SUMMER AND AUTUMN-FLOWERING.

Of the easiest possible culture, and rapidly increasing in popularity; sure to grow and produce abundance of bloom in a great variety of forms and richest colors. The bulbs may be lifted in the autumn as soon as ripe and kept for the next season's planting.

ACHIMENES.

Remarkably showy, free-blooming plants of easy cultivation. Pot the small bulbs early, in a mixture of loam and leaf mould. Keep rather warm, and water with care. After flowering, dry off in the same pots, and keep the bulbs dry and warm during winter.

Mixed Varieties. Very fine colors

. Each 10c., Doz. \$1.00

planted out of doors will bloom freely
quite early. Each, 15c; doz. 1.75

Johnsoni. Very large crimson and white flowers . Vallota Purpurea (Scarborough Lily.) Rich bright scarlet, flower in a cluster, blooming in summer and

BEGONIA, TUBEROUS-ROOTED.

For bedding and as pot-plants, these beautiful flowers are very desirable and popular. They bloom continuously all summer flowers very large, and outrivaling those of the most brilliant Geraniums. They can be grown successfully by any amateur. In habit this fine strain is dwarf, with strong, erect flower-stems, carrying the blossoms above the foliage. The flowers are circular, large and of great substance; the colors are most beautiful, rich and varied. At the low prices we quote, this superb flower is brought within the means of all for liberal planting.

Heuchera Sanguinea. One of the handsomest hardy perennials of recent introduction. The flowers are of a rich crimson color, the leaves light-green. The graceful flowers on long spikes form splendid material for bouquets. 20 cts. each; \$2.00 doz.

HYACINTHUS CANDICANS.

A snow-white summer flowering Hyacinth, growing 3 to 5 feet in height, gracefully surmounted with from 20 to 30 pure white bell-shaped flowers. 5 cts. each; 50 cts. doz.

LILIES.

No class of plants can lay so much claim to our attention as the Lilies. They are stately, elegant and beautiful, and possess the most agreeable perfume, and for general effect, whether growing in garden or house, they have no rivals. The soil should be rich, deep and mellow, with good drainage, as nothing will injure the bulbs more than water collecting and standing around them. Do not put manure about the bulbs when setting, as it collects moisture and insects, and often causes the bulbs are contained. to decay. Top dressing is the better way to enrich the soil after the bulbs are set. The beds should be well covered with leaves and strawy manure to exclude the frost. Set bulbs 4 to 6 inches deep according to their size.

MADEIRA or MIGNONETTE VINE

A rapid-growing vine, covering a large space in a short time. Fleshy, heart-shaped leaves of a light green, and numerous racemes, of feathery flowers of delicious fragrance. A beautiful and popular vine. 5 cts. each, 40 cts. per doz.

MONTBRETIA CROCOSMIFLORA.

This is one of the most floriferous and showy of summer-flowering plants, and destined to great popularity. Planted 6 inches apart in a group in a sunny position and allowed to remain undisturbed for several years, they form magnificent clumps, producing, in great numbers, graceful spikes bearing from 18 to 30 showy star-shaped flowers of orange suffused with red. They flower freely the first season, 20 cts. doz. \$1.00 per 100.

PÆONIES.

We can furnish these well known old favorites in all the newest varieties. Hardy Herbaceous Varieties Named, 50 cts. each.

" Large Roots, various colors, mixed, 25 and 50 cts. each.
Tenuifolia, Fl. Pl. Large double crimson, fern like foliage, 50 cts. each.

TIGRIDIA. (Shell Flower.)

Curious and beautiful shell-like flowers about four inches in diameter, flowering from July to October. The bulbs can be planted about the middle of May, and taken up in October and kept over winter in dry sand.

Each Doz.

EXCELSIOR TUBEROSE.

TUBEROSES.

One of the most delightfully fragrant flowers. Invaluable for bouquets, button-holes and wherever cut flowers are in demand. Before potting the bulbs, remove the small offsets. Use good, rich loam, and start in a hot-bed or forcing pit. They should not be set in the garden till June. Excelsior Double Pearl. Mammoth Bulbs. A

superior strain with very large white flowers, produced in great abundance. Per Doz. 30c.; per 100 \$2.00.

Tall Double. Very free blooming; splendid. Per Doz. 30c.; per 100 \$2.00.

Hartford. Black, large and productive.

Brighton. Red, large and sweet.

Moore's Diamond. White, large, excellent. Moore's Early. Black, large, fine quality. Niagara. White, large, and productive. Pocklington. White, large and sweet. Salem. Red, very sweet and tender. Vergennes. Red. bunches and berries large Wilder. Black, large bunches, sweet. Worden. Black, large, excellent quality.

GRAPES, Foreign Varieties. For growing under glass, \$3.50 each.

Black Alicante. Large, fine, late keeping. Black Hamburg. Delicious, best for gen-

eral use. Golden Hamburg. White, large, flesh melting.

Gros. Colman. Black, round, splendid late sort.

Muscat of Alexandria. Best white, delicious.

RASPBERRIES. \$1.00 per Dozen.

Brinckle's Orange. Large and delicious.

Cuthbert. Rich crimson, berries very large, one of the best.

Golden Queen. Large, firm, and of fine quality.

Gregg. Black-cap; large, hardy, and a vigorous grower; great yielder.

Hansell. Red, fine, very early and productive.

Marlboro. Red, very large, fine quality.

Souhegan. Black-cap; large, productive and hardy.

Turner. Red, medium size, sweet and juicy.

HEDGE PLANTS.

Arbor Vitæ. $1\frac{1}{2}$ to 2 feet, per 100, \$10.00; 2 to $2\frac{1}{2}$ feet, per 100, \$20.00.

Barberry, Common. 1½ to 2 feet, per 100, \$10.00.
Thunberg's. 18 inches, per 100, \$15.00.

Thunberg's. 18 finches, per 100, \$12.00.

Japanese Quince. 1 to 2 feet, per 100, \$12.00.

Hemlock Spruce. 2 to 3 feet, per 100, \$55.00.

Honey Locust. 1 to 2 feet, per 100, \$5.00.

Lilac, Common. Per 100, \$10 00.

Norway Spruce. 1 to 1½ feet, per 100, \$10.00; 1½ to 2 feet, per 100, \$15.00.

Privet, California. 1 to 1½ feet, per 100, \$6.00; 2 to 2½ feet, per 100, 10.00.

Chinese. Ligustrum Ibota. 2 years. 24 to 36 inches, per 100, \$12.00.

FERTILIZERS.

- Clay's Fertilizer. This valuable imported manure is especially recommended to all who grow either fruit, flowers, or vegetables, and wish to bring them to the highest perfection. Should be used in potting soil and spread on staging of greenhouses planted with flowering plants, etc. Per bag of 28 lbs., \$2.25; 56 lbs., \$4.00; 112 lbs., \$7.00.
- Sheep Manure, Pulverized. This is a pure, natural manure, and the most nutritious food for plants. Its effect is immediate, much more lasting and healthy than guano or any other manure. It is the best of all manures for mixing with the soil for greenhouse plants. It makes the richest, safest, and quickest liquid manure, without any deleterious effects.

DIRECTIONS.—For mixing with soil, take one part manure to six parts soil. For making a liquid, take one pound manure to five gallons of water, which can be used with safety daily if necessary. 10 lbs., 50c.; 50 lbs., \$1.50; 100 lbs., \$2.50.

- Our Bone Fertilizers are prepared expressly for our trade; warranted strictly pure.
- **Bone Flour.** Ground perfectly fine; excellent for pot plants or beds where an immediate effect is wanted. Per 100 lbs., \$3.00; in barrels, about 175 lbs., at 2½c. per lb.
- **Bone Meal.** One of the best Fertilizers to use for general purposes. 10 lbs., 50c.; 25 lbs., \$1.00; 50 lbs., \$1.50; 100 lbs., \$2.50; barrel, about 200 lbs., at 2½c. per lb.
- Bone, Coarse or Cracked. Ground coarse for grape borders or poultry. 100 lbs., \$2.50; barrel, about 175 lbs., at 21/4c. per lb.
- Guano Damaraland. A natural bird guano, equal in every particular to the old-fashioned *Peruvian Guano* of twenty years ago. 100 lbs., \$4.00; ton, \$65.00.
- Complete Lawn Dressing. This is the best lawn dressing in the market. It is composed of finely pulverized blood, bone, potash, and refuse meat. The mixture supplies all the essential food elements requisite for the healthy growth of lawns, and is the cleanest of any to handle.
- 10·lb. bag, sufficient for 1,000 sq. ft., \$.50 | 50·lb. bag, sufficient for 5,000 sq. ft., \$1.60 | 25·lb. ", ", 2,500 ", 1.00 | 100·lb. ", ", ", \frac{1}{4} acre, 3.00
- Stockbridge Special Manures. These famous and invaluable fertilizers are well known throughout the entire country. The following are the leading kinds, for Potatoes, Corn and Grain, Small Fruits, Vegetables, Root-Crops, Asparagus, Top-Dressing Grass and Seeding-Down Grass. 100-lb. bag, \$2.00; ton, \$38.00.
- Bowker's Hill and Drill Phosphate. A valuable fertilizer which can be used with equal profit for the hill or drill or sown broadcast. It is one of the richest and quickest acting fertilizers, and may be profitably used on any soil. 50-lb. bag, \$1.25; 100-lb. bag, \$1.75; ton, \$34.00.
- Bowker's Lawn and Garden Dressing. A special fertilizer prepared from chemicals, free from weed seeds, almost odorless, clean to handle, and easily applied.

Trial bags for 1,000 sq. ft., \$.50 50-lb. bags for 5,000 sq. ft., \$1.75 100-lb. mg. for 5,000 sq. ft., \$1.75 100-lb. mg. fr., \$1.75 24 acre, \$1.00

- Bowker's Greenhouse Dressing. Specially prepared as used by Prof. S. T. Maynard, of the Massachusetts Agricultural College, and containing the chemicals recommended by him in his recent address before the National Florists' Convention. Bag, for 100 plants, one year, \$1.00. Quotations for large quantities on request.
- Unleached Hardwood Ashes. As a fertilizer for lawns, gardens, and fruits Hardwood Ashes are unequaled; they are not a mere stimulant, but supply natural plant food, permanently enriching the soil. Clean, free from offensive odor, and can be applied by any one. They are exceedingly valuable for lawns, imparting a rich, dark shade of green and destroying many of the insects which are so injurious. In barrels, ton, \$18.00; barrel, \$2.50.
- Bradley's Superphosphate. This well-known fertilizer has been a standard fertilizer for years. It quickens the growth of the crop and brings it to earlier maturity. 100 lbs., \$1.75.

Sulphate of Ammonia. 'Best grade') 24¾ to 25½ per cent. ammonia. 10 lbs., 60c.; 100 lbs., \$4.00.

Muriate of Potash. 80 to 85 per cent. 10 lbs., 50c.; 100 lbs., \$3.25

Nitrate of Soda. 95 to 98 per cent. pure. 10 lbs., 50c.; 100 lbs., \$3.25

- Sulphate of Potash. 50 to 55 per cent. sulphate of potash, 35 to 40 per cent. sulphate of magnesia, and not over 2½ per cent. chlorine, excellent for potatoes and small fruits. 10 lbs., 50c.; 100 lbs., \$3.25.
- Land Plaster. For destroying bugs on cucumber, melon, and squash vines. 5 lbs., 15c.; 25 lbs., 50c.; bbl., \$2.00.
- **Swift's Lowell Animal Brand.** A well-balanced high grade fertilizer for all crops, and popular with market gardeners. It contains double the potash usually found in ordinary fertilizers, and costs no more. 50 lb. bag, \$1.25; 100 lb. bag, \$2.00; ton, \$35.00.

Swift's Lowell Potato Phosphate. A moderate cost fertilizer for potatoes, used largely in Aroostook County, Maine. Will grow potatoes quickly and will feed the crop during its entire growth. Its potash is in the form of sulphate, which produces the best quality of potatoes. 50 lb. bag, \$1.30; 100 lb. bag, \$2.25;

ton, \$37.00.

Swift's Lowell Bone Fertilizer. A quick acting fertilizer for general use in the hill or drill with or without manure. Contains 3 to 4% potash, in addition to ammonia and available phosphoric acid derived from organic matter. 50 lb. bag, \$1.00; 100 lb. bag, \$1.75; ton, \$33.00.

INSECTICIDES.

Nicoticide Fumigating Compound. This liquid preparation is used for destroying green and black fly, thrip, mealy bug, red spider, etc. It may be used with every confidence in houses containing the most tender plants in full bloom, without the least damage to either foliage or flowers, and for this reason it is a great boon to growers of all kinds of tender plants, which are subject to the attacks of aphis. The vapor given off by the compound does not alter the natural color or scent of the flowers. 1 pt., for 32,000 cubic feet, \$2.50; ½ pt., for 16,000 cubic feet, \$1.25; ½ pt., for 8,000 cubic feet, 70 cents.

Fumigators for Vaporizing. Stand, pan, and lamp, 50 cents each.

- Aphis Punk, Nikoteen. A special preparation of nicotine for the extermination of green and black fly, thrip, etc., contains no ammonia, and does not injure delicate plants. Per box of one dozen rolls (720 grains nicotine), 60 cents.
- Bug Death. A patented, non-poisonous powder, entirely different from anything yet offered for the purpose, and as effectual as Paris Green. It is sure death to the potato, squash, and cucumber bugs, currant and tomato worms, also other plant and vine eating pests. If used according to directions injury cannot result to the most tender plants, and it has a tendency to assist growth. For potatoes a 12½-lb. package is sufficient for an acre. For spraying trees it has no equal. 1-lb. box, 15 cts.; 3-lb. box, 35 cts.; 5-lb. box, 50 cts.; 12½-lb. box, \$1.00; 100-lb. case, \$7.00.

Perfection Shaker, 65 cents.

- **Cow-oil-ene.** Fly-oil for Cattle and Horses. This gave great satisfaction last season; it is absolutely harmless, easily applied, and a sure preventative. Per gal., \$1.00. **Sprayer** for same, 50 cents.
- "Nico-Fume." For fumigating green-houses. "Nico-Fume" is positively the strongest tobacco-paper on the market; does not injure blooms, and furnishes the easiest method of fumigation ever devised. Packed in special friction-top tins. 24 sheets, 75 cents; 144 sheets, \$3.50; 288 sheets, \$6.50.

INSECTICIDES.

A LIQUID INSECTICIDE

Nikoteen is composed of that element in tobacco which gives its value as an insecticide and nothing else. The best Extracts of Tobacco contain from 1½ to 2½ per cent. of nicotine. This

preparation contains 40 per cent. nicotine. Is the cheapest, cleanest and most effective of insecticides and will not injure or discolor delicate plants. Pint bottle, \$1.50.

- Thymo-Cresol. A highly concentrated and powerful preparation for dipping or washing SHEEP, and for ridding all LIVE STOCK of Parasitic Vermin. It forms a PERFECT SHEEP DIP, as it is rapidly fatal to all the insect pests which infest domestic animals, but is at the same time quite harmless to the animals themselves and to man. The method of preparation is extremely simple, as it mixes at once with either cold or warm water. It contains principles which promote the growth of the wool. "The only successful sheep dip in use." Pint, 45 cts.; one-half gallon, \$1 00; gallon, \$1.75.
- Fir-Tree Oil. A preparation for destroying insects and parasites, such as mealy-bug, red spider. scale, thrip, green fly, fleas, etc. It answers every purpose as an insecticide, and when used as a wash for dogs or animals is harmless to the hands and skin. Full directions with each can. Half-pint, 50 cts.; pint, 75 cts.; quart, \$1.25; half-gallon, \$2 50.
- Tobacco Extract Rose Leaf. A perfectly pure, highly concentrated extract of Tobacco, always uniform in strength of Nicotine poison. Destroys green fly, mealy bug, thrip and red spider. Pint, 30 cts.; quart, 50 cts.; gallon, 1.50; 5 gallons, \$5.00.
- Tobacco Soap, Pinners. Manufactured from the essential oil of tobacco, for the destruction of all insects, parasites and their eggs. One-half lb., 25c.; lb., 40c.
- Tobacco Dust (Pure). A sure remedy for green fly, cheaper than snuff and quite as effectual. 5 lbs., 25 cts.; 100 lbs., \$4.00.
- Tobacco Dust and Sulphur. Prevents and cures mildew, kills green and black flies and other insects; has the double advantage of being a fertilizer as well as an insecticide. 1 lb., 10 cts.; 100 lbs., \$6.00.
- **Tobacco Stems.** For fumigating. Invaluable as a mulch for rose beds, lettuce beds, etc., where insects frequently do much injury to roots or foliage. The best quality of stems supplied. Per barrel, \$1.00; in bales, 2 cts. per lb.
- Little's Antipest. A safe and sure preparation for the destruction of all insect pests, equally suitable for Greenhouse, Garden and Orchard. Pint, 60 cts.; quart, \$1.00; gallon, \$2 50.
- Bordeaux Mixture, Lion Brand. A valuable and indispensable fungicide for grape growers, ensuring larger crops and finer grapes, and preventing failure. Successful against black rot, mildew and rust. Being in liquid form it is very convenient to handle. One gallon will make fifty gallons of spraying liquid. Quart, 40 cts.; gallon, \$1.00.
- Paris Green, "Lion Brand," new process. This will be found superior to any other Paris Green yet offered; it is lighter in weight for a given quantity and more soluble. It is stronger in active poison, and adheres better to the foliage. Per lb., 25 cts.
- Whale Oil Soap. For destroying insects on plants, trees, vines, etc., and for washing the bark of trees. 1 lb., 15 cts.; 5 lb., 50 cts.
- Flour of Sulphur. Prevents and cures mildew on plants. Lb., 8 cts.
- Hellebore Powder. One of the best insecticides for Green Fly, Rose Slugs, Currant Worms and other insects. Lb., 30 ets.
- Persian Insect Powder. It is invaluable to the housekeeper for the destruction of Flies, Fleas, Roaches, and other insects. Lb., 50 cts.

INSECTICIDES. Etc.

Slug Shot, Hammonds. One of the cheapest and best powders for destroying the cut worm, potato bug, rose bug, rose slug, curculio, worms or caterpillars upon vines. tobacco, cotton or egg plants, currants and fruit trees. Is an excellent fertilizer, contains nothing injurious to domestic animals, and does not deteriorate by age. On low growing plants, it should be dusted on with a very fine sifter. On tall shrubs and trees, it should be applied with a bellows. **Price**, five lbs., 30 cents; ten lbs., 50 cents.

Grape Dust, Hammonds. A preparation for destroying mildew on grape vines. Can also be used on plants or trees affected with mould, mildew or rust mites, either in greenhouses or the open air. Its diffusibility is great, one part of Grape-dust will spread itself over a greater surface than sulphur. To be thoroughly effectual, it must be applied frequently by dusting, as atoms of fungi are always spreading or floating. Apply at the first appearance of trouble. Dust on a warm, dry day. Price, five lb. package, 35 cents.

MORRILL'S CANKER WORM EXTERMINATOR.

A Sure Protection for Fruit and Ornamental Trees from the Ravages of the Grub and Canker Worm.

As easily applied as paint or whitewash, by first placing a band of tarred paper six inches in width, securely fastened, around the tree, four feet above the ground, and covering the paper thoroughly with the Exterminator, using a common paint brush.

LAWN MOWERS.

As our business is confined entirely to the best trade, that demand the best goods, we have decided to handle none but Coldwell's make of Lawn Mowers for the coming season. We have sold these during the past 6 years with better results than any other make, and we can thoroughly recommend them to be the best made, lightest running and best cutting machine on the market. The Horse Mower and Imperial Hand Mower are so well known that it is useless to comment on them here.

The Chain Roller Mower has been in use on the leading Golf Links during the past 3 years, and have proven themselves to be the best machine for this work. These

are the only machines made especially adapted to border cutting.

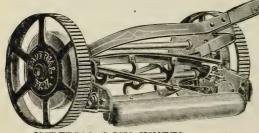

The Motor Mower is the latest invention of Mr. Coldwell; it cuts a 40 inch swarth, cost of fuel is 40 cents for 10 hours. For large places, where perfection of lawn is required, this machine not only cuts and rolls the lawn, but the engine, which is of four horse-power, can be utilized for cutting wood, pumping water, threshing or other work, without removing it from the Lawn Mower.

Absolute guarantee with every Lawn Mower. Satisfactory in every respect or no sale.

"COLDWELL" IMPROVED

COLDWELL'S IMPERIAL LAWN MOWERS.

market. The principal feature of these machines is that the bottom knife-bar is bolted to the sides, thus making the frame perfectly rigid, while by a new patent hanger the revolving cutter is adjusted to the bottom knife. This is the reverse of the adjustment in all other mowers. When the knives are properly adjusted a lock screw secures them in position.

Coldwell's Chain Roller Mower for Golf Links and Borders.

In addition to the usefulness of this Mower for regular lawn work, it will perfectly cut the grass on borders, even though they are narrow strips of sod between flower-beds and walks, where a side-wheel Mower would have one wheel off the border.

The Chain-Roller Mower is strictly high grade and should last for years. The chain, in place of gears, reduces the noise and friction. The Self-Dumping Grass Catcher is the best ever used.

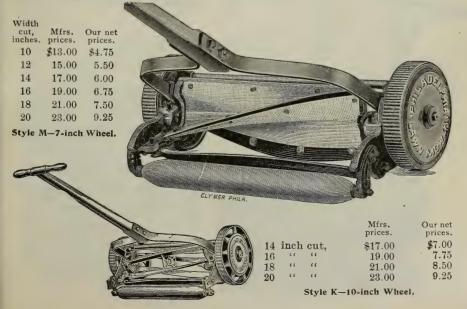

14 inch, 4 blades \$11.75, 6 blades \$12.50; 16 inch, 4 blades \$13.00, 6 blades \$13.50; 18 inch, 4 blades \$14.50, 6 blades \$15.00.

Sprayer Insect Exterminator

Simple, practical, effectual. By far the most economical as well as the most effectual device for applying paris green, with little labor. Paris green applied with the Electric will kill potato bugs, all sizes and all ages,

every time, and only one pound required for an acre of potato vines.

Experience has proven that paris green applied in its pure, unadulterated state does not injure vines, and is far more effectual than when mixed with plaster or any other substance. Every farmer who once tries the Electric in killing potato bugs will never do without it.

Each, \$1.00.

Improved Electric Sprayer. Especially

recommended for spraying all kinds of plants, bushes, vines, and shrubs. The great improvement of this sprayer over others is that it can be used as well for powder as liquids and its moderate cost. Tin, each, \$1.00; Copper, each, \$1.25.

Sprinkler, Scollay's Rubber. Made of rubber, with flat bottom, and a detachable brass top, finely perforated. Each, \$1.00.

Sprinkler, Scollay's Angle. For sprinkling under side of the leaves, designed for applying liquid insecticide or water. Price, \$1.00.

Sprinkler, Columbia Rubber. The bulb is made of soft rubber, the top of hard rubber with detachable screw cap, and is extremely useful for all purposes to which a sprinkler is put. Large size, 75c.; medium size, 50c.

Putty Bulb, Rubber. For applying putty to sashes. The putty in a semi-liquid state is ejected by pressing the bulb, enabling one to do the work very rapidly. Price, \$1.00.

Squilgees or Rubber Mop. Edged with pure rubber, 75c.

PLANT STAKES.

The Round stakes are light, very neatly turned, tasty, and suitable for plants in pots, also for Carnations, Gladiolus, and various other plants, in the open ground.

The Square Stakes are suitable for tying up Roses, Dahlias, Climbers, etc.

WATER BARREL TRUCK.

This truck is a great improvement upon all trucks hitherto offered. By means of a simple arrangement of the Axle, the Barrel can be detached at pleasure, whether full or empty. Any desired number of Barrels can be used with the same truck. This contrivance is very useful for carrying water to the garden or lawn during dry weather, for emptying cesspools, and for innumerable other purposes.

Water Barrel with Truck complete, \$10.50 Water Barrel with Trunions, \$2.75. Box or Cart, with Trunions, \$3.50.

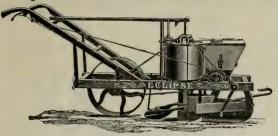

STEEL DRAG SCRAPERS.

Our scrapers are shaped from a single sheet of cold steel, being lapped and riveted at the corners, thereby rendering them uniform in thickness throughout, except at corners, where they are of double thickness.

WHEEL SCRAPERS.

Eclipse Corn Planter and Fertilizer Distributor Comb'd.

For planting Field or Ensilage Corn, Beans, Peas or Beet Seeds, in hills, drills or check, will accurately distribute all Commercial Fertilizer, Wet as well as Dry, Pulverized Hen Manure, Plaster, Ashes and other fertilizers of like consistency, with a certainty. Has concave places each side of plow, which are of great importance in placing moist earth on the seed, just before the

on the seed, just before the fertilizer is dropped each side of seed. A great advantage on very dry ground or in a dry season. Price, \$25.00.

King of the Cornfield Corn Planter and Fertilizer Sower Combined.

Plants Corn, Beans, Peas, Beet and Other Seed of Like Size.

Special award of the Maine State Agricultural Society of Grand Silver and Gold medals in 1892, '93, '94, '95. This is the only machine made that can plant two kinds of seed in alternate hills. The concave wheel covers the corn nicely. We have thousands of testimonials of their superior merits from dealers and users. Send for circular. Weight, 180 lbs. Price, \$25.00.

The Universal Weeder and Cultivator.

A perfect weeder for all hoed crops, and does away with the use of the hand hoe.

For putting in grain, grass seeds or millet, it has no equal; distributes the seed evenly and at a uniform depth, at the same time pulverizing the soil and forming a perfect seed bed.

We recommend the Weeder to all Market Gardeners as an implement well adapted to

perform many kinds of work which generally takes a great deal of time.

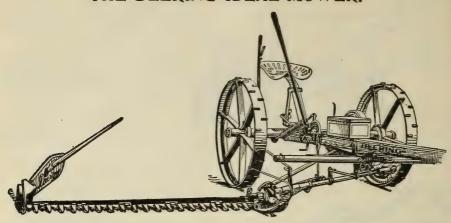

Easy to operate Light to handle A great saver of time and money

Easy to operate. Light to handle. A great saver of time and money.

Permanent Tooth Weeder, \$4.50

Send for special descriptive circular.

THE DEERING IDEAL MOWER.

Weight properly distributed is absolutely essential in mowers to insure machines that will do satisfactory work under all conditions. The working parts of the Ideal Mower are made of the best steel, malleable and wrought iron. The pitman is long and strong, made of well seasoned second growth hickory. The wheels are high and powerful, are connected by a heavy steel axle. The frame is staunch and wide, striding the cut grass, so that the wheels travel in a clear track. Deering roller and ball bearings make the Ideal Mower so light in draft that it is a worthy example of the well known Ideal line of machines. Ideal Mowers have a perfectly floated cutter-bar; a coil spring not only assists the operator in raising the cutter-bar, but takes just enough of the weight of the cutter-bar off the ground to permit the bar to float with perfect ease and freedom. Price on application.

DEERING ONE-HORSE MOWER

has given entire satisfaction on farm, salt meadows and orchards. Many of the parks use it for cutting lawns and parks. Like the regular Ideal it is fitted with ball bearing rollers, long wooden pitman, forged steel couplings, a positive and direct stroke. Its action perfectly free, which makes it the most durable, easy of handling and lightest draft mower made. Cuts 3½ and 4 feet. The foot lift cannot be surpassed. The Deering Mower knives and section are made from a special grade of steel. They are stamped with the name Deering, a satisfactory guarantee. Price on application.

THE DEERING HAY TEDDER.

Light draft, noiseless, simple, durable and ease of operation are ample proof that the machine has been built on the right principles and out of the best material. Wheels high; forks on the outside; frame cannot twist or sag; spring steel fork; coil springs to prevent breakage. The frame tilts up, relieves the forks should they strike the ground. Combination thills and pole. Price on application.

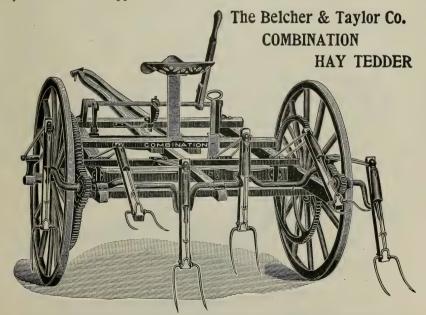

THE DEERING IDEAL HAY RAKE.

A rake must be strong, simple and durable to make it valuable. The Ideal Rake is noted for those qualities. They are constructed of the best steel. The angular steel parts are hot riveted instead of bolted, which renders it less liable to get out of repair. The wheels are interchangeable, and are the strongest ever put on a rake. The teeth are made of the finest oil tempered

spring steel. Operator may adjust the rake to regulate the height of the teeth and the time of their return to the ground. Combined pole and thills are furnished with every rake. Price on application.

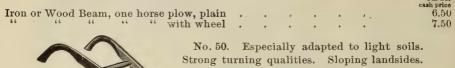

Intermediate and crank gears are covered with shields not shown in the above cut.

In the construction of this machine, all the best features of the Improved Bullard and Mudgett Tedders are used, with valuable improvements of our own, and our aim to make a tedder that will be more durable and cost the user less for repairs than any machine now on the market, we believe has been fully accomplished. Price on application.

We are New England Headquarters for the SYRACUSE CHILLED PLOW CO., and carry in stock a full line of Plows, Harrows, Cultivators, Drag Scrapers, Wheel Scrapers, Steel Wheelbarrows, Canal Barrows and Hand Push Carts. Also a full line of repairs in stock.

SYRACUSE REVERSIBLE SULKY PLOW. STEEL MOLDBOARDS AND STRIPS. CHILLED OR STEEL POINTS.

Does perfect work on hillside or level land. No ridges or dead furrows. Light and strong. Simple and practical. Power lift for raising the plows. An adjustable pole regulates the width of furrow, also avoids all side strain on the team. Lighter in draft than a hand plow doing the same work. (Send for special circular.)

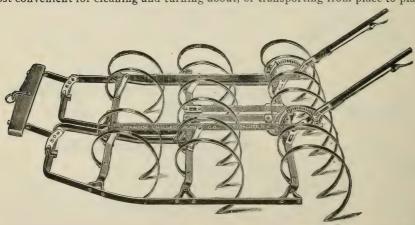

With each Sulky is furnished two extra Cast Points, two extra Jointer Points, a Screw Wrench, Neck Yoke, and Two Horse Whiffletrees.

If it is desired to use three horses on the above Sulky, attachments can be furnished when ordered. Price, \$45.00.

SYRACUSE SPRING TOOTH HARROWS, WITH LEVERS.

Frame, Tooth-bearing Bars, and Teeth are Steel. The frame runs on Steel Shoes, which can be renewed at small expense. All castings Malleable. Superior work. Most convenient for cleaning and turning about, or transporting from place to place.

Points and Stationary
Wheel, \$7.00

No. 53. Five 3 in. P'ts., Wing Points, Shovel Points and Wheel, \$6.00

No. 81. Five 3 in. Points and Wheel, \$4.50.

These Cultivators are made with an extra

long and heavy frame and are fitted up with Jersey Points and long Hiller Sweeps which are unsurpassed for hilling-up potatoes and other crops.

With the standards and points removed, excepting the one on the centre bar, the Cultivator is formed into a Furrowing Plow; or by reversing the sweeps and fastening the centre standard at the rear end of the bar it is changed to a Coverer.

No. 101. Expanding Lever, five Jersey Points, Hiller Sweeps and Wheel, \$7.50. No. 156. Expanding Lever, five Jersey Points, Hiller Sweeps and Lever Wheel, \$8.50.

SYRACUSE SPIKE TOOTH CULTIVATORS.

Especially adapted to pulverize the soil and leave it smooth and level. The teeth are reversible and the pitch can be quickly changed forward or back by simply loosening one bolt at each tooth.

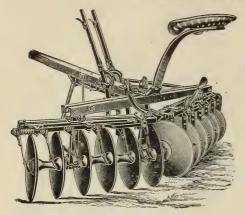

No. 111. Fourteen Spike Teeth and Wheel, \$5.50.

No. 114. Expanding Lever, Fourteen Spike Teeth and Wheel, \$6.25 is spike T

Our Skilled Mechanics, Experience and Tools place us in the best possible position for doing this class of work with promptness and satisfaction. Sendyour machines AS SOON AS POSSIBLE. We will store them through the winter, if you desire without charge.

through the winter, if you desire, without charge, and return them when wanted in first-class condition.

SYRACUSE ALL STEEL-FRAME DISC HARROW.

For Crushing Clods, Pulverizing Hard-Baked Clay Land, or Cutting up Sod Ground No Harrow Rivals the New Syracuse.

We show in the above the new Syracuse Steel-Frame Disc Harrow with double

The Frame, both in the crosshead and gang beams, is made of double bars of highly tempered angle steel, giving both strength and rigidity. Attached to the Frame are steel arms which connect the bearing boxes. Each Gang has a double-jointed hinge which acts vertically and horizontally, giving flexibility and free action when working on uneven ground. By means of the adjustable hold-down casting at the inside ends of the Gangs, the Harrow can be made to cut at a uniform depth the full length.

Draft .- The Harrow draws direct from the axle, which, in connection with the excellent bearings of the Syracuse, obviates all tendency to side draft or neck-weight

of the pole.

Levers. - The Levers are placed within easy reach, and each gang moves separately, so that they are easily operated. The Gangs can also be set at different angles, when necessary, which is an invaluable feature when working on side-hill or rolling

The Scrapers of the Syracuse are known as the individual Gang Scraper, one for each Disc, with shanks of tempered spring steel, with long controlling rod, held in position by a secondary spring, and operated by a pivoted foot treadle at the end.

Discs.—Oil-tempered Steel Discs, either round or cut, are furnished, the latter

being sent only on special orders.

The Hitch. - As shown in our cut above, the Harrow is arranged for a two-horse hitch, but we furnish same with three or four-horse hitch if so specified. For the three-horse hitch we furnish an extra crossbar and whippletree to be attached to the side of the pole by an extra casting, thus making a perfect arrangement and avoiding all side draft.

We furnish the cut-away Disc as well as the plain ones when so desired. The following sizes are furnished:

12 16-inch Discs, cuts $6\frac{1}{2}$ feet.

12 16-inch Cut-away Discs, cuts 61/2 feet, complete.

REPAIRS.

We carry a full line of repairs for all the leading Plows, Cultivators, Harrows,

Mowing Machines, Rakes, Tedders, etc.

We have greatly enlarged our repairing department, and with our skilled mechanics, who have had many years' experience at this kind of work, we are now placed in the best possible position for repairing of all kinds of farm and garden tools We devote special attention to this feature of our business, and can and implements. do first = class work at reasonable prices.

We make a specialty of repairing Lawn Mowers, and, as we carry a complete stock of repairs for all leading machines, we are enabled to ship promptly and guar-

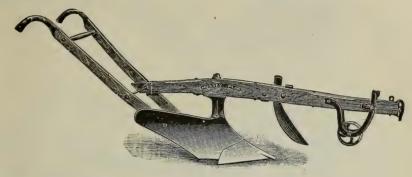

antee every machine we repair to work in a satisfactory manner.

HUSSEY HARD METAL PLOWS.

Superior workmanship, strength, durability, lightness of draft, thoroughness of work, scouring capacity in every kind of soil, steadiness in the ground, and facility of adaptation to all kinds of work, are the qualities possessed by the Hussey Plows. and which have made them such favorites among farmers and dealers.

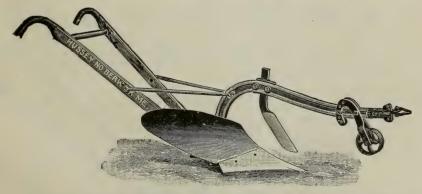

Among the recent improvements added to our Plows, we might mention that we are using a Solid Steel Cutter, and Steel Truck-Straps, and that we have lengthened the Iron Strap under the Beam so that it now extends from the standard to the Clevis.

Any information about our Plows or Cultivators, not given in this catalogue will be gladly furnished.

We :axry in stock a full line of Hussey Repairs, both for Plows and Cultivators.

"IRON AGE" CULTIVATORS, ETC.

For general work there are no hand tools made to compare with the "Iron Age." They do the work. All the tools are built of the best possible material and the prices are as low as such high grade stock will admit of.

THE NEW MODEL SEED DRILL.

This we consider the simplest and best drill on the market. The diamond-shaped adjustable hole regulates the discharge, and can be made larger or smaller, as occasion requires. No other drill has this advantage. The seed cut-off claps up underneath the hole; it does not slide under the same, as in other similar drills; on this account it does not clog nor cut the seed. It has a broad wheel and a covering roller. The opening plow is adjustable in depth. The whole make-up of the drill is simple. It can be worked by any one. Price \$7.00.

THE "IRON AGE" DOUBLE WHEEL HOE.

At a glance one can see the great usefulness of this tool. The garden or farm is incomplete without at least one of these tools. In cultivating onions, beets, turnips, radishes, etc., it is invaluable; sayes hours of hard labor and does the work better than

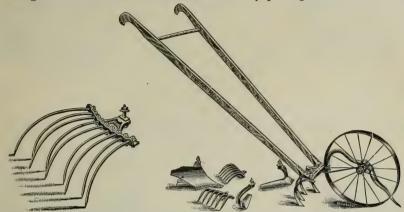

great advantage which this double wheel hoe possesses is that it can be made into a practical single wheel hoe in a moment's time. An axle is sent with every double wheel hoe for this purpose. The wheels are sixteen inches high, enabling the wheel hoe to run easy and without yielding to the depressions of the soil, as a low wheel will do. The frame being made of tubing coupled to malleable castings gives great strength, together with lightness. All the tools shown in the cut go with the machine for the price, \$6 50.

several men could do it in the same time. One

In order to accommodate those who have only use for the wheel hoe for hoeing, we offer the machine described above, with hoes only, at \$4.00.

THE "IRON AGE" SINGLE WHEEL HOE, CULTI-VATOR, PLOW, AND RAKE.

This tool is, in regard to the work done, almost a counterpart of the Double Wheel Hoe, and the same remarks as to its construction, extreme lightness, and ease of operation will apply with equal force. In addition, its lower price, less weight, and increased steadiness given by a *single* wheel make strong arguments in favor of this tool. For the small kitchen garden we consider the single wheel hoe very valuable. The work is done principally between the rows, although the plants of small growth can be hoed on both sides at once by placing the wheel on the left

side. With this single wheel tool, spaces of exceedingly narrow width can be worked, even using but one cultivator tooth. With the large plow attachment, deep furrows can be opened or closed; potatoes, celery, and other crops hilled; in short, all such work usually accomplished by a special plow. Packed weight, 28 pounds. Price, \$5.00. We also have a weeder attachment for this tool similar to the ones used on the

Double Wheel Hoe, a capital thing. Price, \$1.00.

HORSE LAWN BOOTS.

BAKERS.

without leather tips

Bakers, with leather tips

Links Lawn, per set

For Lawn or Golf work, Horse Boots are indispensable for use in connection with Mower or Roller. They prevent the horse sinking in damp or soft places

and do not cut or tear up the turf. The following patterns are the ones in general use; each having been adopted for some particular merit of its own. All are made from carefully selected material, are very durable and easily adjusted. If your lawn looks bad after mowing, a set of lawn boots will probably remedy the trouble.
